Contents

PART 1

i Editorial

1 Why does DNA-dependent RNA polymerase I from higher plants possess a more complex subunit structure than the enzyme from *Escherichia coli*? A hypothesis: opinion
K. Grossmann

5 Isolation of *Capsicum annuum* leaf nitrate reductase and characterization of the effect of adenine nucleotides and NADH on its activity
W. Wallace & B. T. Steer

13 *In situ* localization of the sites of paraquat action
K. C. Vaughn & S. O. Duke

21 The cytological effects of the gametocides Ethrel and RH-531 on microsporogenesis in barley (*Hordeum vulgare* L.)
C. W. Colhoun & M. W. Steer

31 Effect of number and configuration of fruits, photon flux and age on the growth and dry matter distribution of fruits of *Pisum sativum* L.
C. C. Hole & P. A. Scott

39 Scanning electron microscopic aspects of short tuberized roots, with special reference to cell rhizodermis evolution under drought and rehydration
N. Vartanian, D. S. Wertheimer & H. Couderc

47 A bimodal germination response to temperature in cocklebur seeds. I. Cyanide-sensitive and cyanide-resistant respirations
Y. Esashi, N. Ishihara, K. Saijoh & M. Satoh

55 A bimodal germination response to temperature of cocklebur seeds. II. ATP and adenylate pool
Y. Esashi, T. Nagayama, M. Satoh & K. Saijoh

65 Control of plant growth by nitrogen: differences between cereals and broadleaf species: short communication
J. W. Radin

69 Photogeneration of a bioelectric field by red and far-red irradiation in soybean hypocotyls: short communication
T. Tanada

73 Book reviews

PART 2

77 Sensitivity of tobacco tissue cultures to chloramphenicol and its photodegradation products
R. Barg, N. Umiel & Y. Nitzan

83 Fate of chloramphenicol in tobacco tissue culture under various light regimes
R. Barg, N. Umiel & Y. Nitzan

89 Enhancement of Pfr-mediated responses by light pretreatments: persistence of the pretreatment effects
C. B. Johnson & G. C. Whitelam

95 Direct and indirect effects of light on stomata. I. In Scots pine and Sitka spruce
J. I. L. Morison & P. G. Jarvis

103 Direct and indirect effects of light on stomata. II. In *Commelina communis* L.
J. I. L. Morison & P. G. Jarvis

111 Effects of light on the catabolism of [2-^{14}C]-3-indole acetic acid in protoplasts, a chloroplast-rich fraction, and a crude cytoplasmic preparation from barley (*Hordeum vulgare* L.): short communication
G. Sandberg, E. Jensen & A. Crozier

117 Interaction between light and chilling temperature on the inhibition of photosynthesis in chilling-sensitive plants
S. B. Powles, J. A. Berry & O. Björkman

125 The dynamics of H^+ efflux from the trap lobes of *Dionaea muscipula* Ellis (Venus's flytrap)
P. A. Rea

135 Quantum yields for CO_2 uptake in some diploid and tetraploid plant species
B. A. Osborne & M. K. Garrett

145 Optimal water-use efficiency in a California shrub
W. E. Williams

153 Spine influences on PAR interception, stem temperature, and nocturnal acid accumulation by cacti
P. S. Nobel

161 An apparatus for pulse and pulse-chase experiments with $^{14}CO_2$ on attached leaves with known, steady-state rates of photosynthesis: technical report
D. A. Jones, A. M. Smith & H. W. Woolhouse

167 Book reviews

PART 3

173 Thoughts on the possible role of phytochrome destruction in phytochrome-controlled responses: opinion
G. Blaauw-Jansen

181 Transport of gases into leaves
R. Leuning

195 A precise potentiometric method for determination of algal activity in an open CO_2 system

O. Hofslagare, G. Samuelsson, S. Sjöberg & N. Ingri
203 Calcium transport and ATPase activity in a microsomal vesicle fraction from corn roots
G. Zocchi & J. B. Hanson
211 An alternative method for analysing pressure–volume curves produced with the pressure chamber
R. Sinclair & W. N. Venables
219 Associations between plant production and some physiological components of drought resistance in wheat
A. Blum, J. Mayer & G. Gozlan
227 Changes in the proportion of endogenous osmotic solutes accumulated by *Chlorella emersonii* in the light and dark
T. L. Setter & H. Greenway
235 Time course of signal transduction in phytochrome-mediated anthocyanin synthesis in mustard cotyledons: short communication
R. Schmidt & H. Mohr
239 Movement of fluorescein into isolated caryopses of wheat and barley: short communication
H. Cook & K. J. Oparka
243 Further examination of the effects of IAA and anoxia on the growth rate and the spatially separate electrogenic ion pumps in bean hypocotyl: short communication
A. Mizuno & H. Okamoto
247 A multichannel microcomputer-based system for continuously measuring and recording ion activities of uptake solutions during ion absorption by roots of intact plants: technical note
A. D. M. Glass, M. Y. Siddiqi & C. E. Deane-Drummond
255 A method for measuring radial differences in water content of intact tree stems by attenuation of gamma radiation: technical report
W. R. N. Edwards & P. G. Jarvis
261 Book reviews

PART 4

267 Analysing partitioning in plants: opinion
A. Lang & M. R. Thorpe
275 Stomatal mechanism as the basis of the evolution of CAM and C_4 photosynthesis: review
W. Cockburn
281 Effects of low temperature on photosynthesis: review
G. Öquist
301 Photosynthesis, photorespiration and nitrogen metabolism: review
R. M. Wallsgrove, A. J. Keys, P. J. Lea & B. I. Miflin
311 Photosynthetic electron transport in relation to thylakoid membrane composition and organization: review
J. Barber
323 The uptake of inorganic carbon by freshwater plants: review
N. A. Walker
329 Chloroplast metabolism: the pathways of primary carbon metabolism in C_3 plants: review
R. McC. Lilley
345 C_4 photosynthesis at low temperatures: review
S. P. Long

PART 5

365 Correspondence
369 The role of peristomatal transpiration in the mechanism of stomatal movement: opinion
U. Maier-Maercker
381 The influence of NaCl concentration on the amino acid and neutral soluble carbohydrate content of *Dunaliella*
M. E. Ginzburg, C. Brownlee & D. H. Jennings
385 Significance of inhibition of seed germination under the leaf canopy in ash coppice
T. L. Pons
393 Effects of external NaCl, and of changes in turgor pressure and volume, on K^+ concentrations in *Chlorella emersonii*
H. Greenway & E. Watkin
401 Analysis of growth during geotropic curvature in seedling hypocotyls
I. R. MacDonald, J. W. Hart & D. C. Gordon
407 The use of model-fitting in the interpretation of 'dual' uptake isotherms
A. C. Borstlap
417 Accumulation and conversion of sugars by developing wheat grains. 3. Non-diffusional uptake of sucrose, the substrate preferred by endosperm slices
A. H. G. C. Rijven & R. M. Gifford
427 The site of action of abscisic acid at the guard cell plasmalemma of *Valerianella locusta:* short communication
W. Hartung
429 Plant cell extension: structural implications for the origin of the plasma membrane: short communication
E. Quaite, R. E. Parker & M. W. Steer
433 Endogenous ethylene does not initiate but may modify geobending—A role for ethylene in autotropism: short communication
P. E. Clifford, D. M. Reid & R. P. Pharis
437 An integrating sphere leaf chamber: technical note
D. B. Idle & C. W. Proctor
441 Book reviews

PART 6

451 Stomatal response to vapour pressure deficit and the effect of plant water stress
J. D. Johnson & W. K. Ferrell
457 Chill-induced wilting and hydraulic recovery in mung bean plants
D. Bagnall, J. Wolfe & R. W. King
465 Plasmolysis shape in relation to freeze-hardening of cabbage plants and to the effect of penetrating solutes
J. Levitt
471 Protection of pollen germination from adverse temperatures: a possible role for proline
H.-Q. Zhang & A. F. Croes
477 Protective mechanisms and acclimation to solar ultraviolet-B radiation in *Oenothera stricta*
R. Robberecht & M. M. Caldwell
487 Crystalline arrays of ribosomes in isolated pea chloroplasts
U. M. Praekelt, A. J. Rowe & H. Smith
493 Transition from primary dormancy to secondary dormancy in cocklebur seeds
Y. Esashi, R. Kuraishi, N. Tanaka & S. Satoh
501 Salt activation and inhibition of membrane ATPase from roots of the halophyte *Atriplex nummularia*
H. R. Lerner, L. Reinhold, R. Guy, Y. Braun, M. Hasidim & A. Poljakoff-Mayber
507 Abscisic-acid-induced turion formation in *Spirodela polyrrhiza* L. I. Production and development of the turion
C. C. Smart & A. J. Trewavas
515 Abscisic-acid-induced turion formation in *Spirodela polyrrhiza* L. II. Ultrastructure of the turion; a stereological analysis
C. C. Smart & A. J. Trewavas
523 Book reviews

PART 7

525 A comparative study of low-temperature-induced ultrastructural alterations of three species with differing chilling sensitivities
R. R. Wise, J. R. McWilliam & A. W. Naylor
537 The effect of CO_2 on potassium transport by *Chlorella fusca*
H. W. Tromballa
545 Water-relation parameters of giant and normal cells of *Capsicum annuum* pericarp
J. Rygol & U. Lüttge
555 ATP-dependent proton uptake inhibited by *Cercospora beticola* toxin in pea stem microsomal vesicles
F. Macrì, P. Dell'Antone & A. Vianello
559 Diurnal course of the temperature in a *Lithops* sp. (Mesembryanthemaceae Fenzl) and its surrounding soil
B. M. Eller & A. Nipkow
567 Interactions between growth, Cl^- and Na^+ uptake, and water relations of plants in saline environments. I. Slightly vacuolated cells
H. Greenway, R. Munns & J. Wolfe
575 Interactions between growth, uptake of Cl^- and Na^+, and water relations of plants in saline environments. II. Highly vacuolated cells
H. Greenway & R. Munns
591 Book reviews

PART 8

595 Light and dark assimilation of nitrate in plants: review
Y. P. Abrol, S. K. Sawhney & M. S. Naik
601 Vacuolated plant cells as ideal osmometer: reversibility and limits of plasmolysis, and estimation of protoplasm volume in control and water-stress-tolerant cells
J. P. Palta & O. Y. Lee-Stadelmann
611 Leaf area index, canopy structure and photosynthesis of red clover (*Trifolium pratense* L.)
D. Joggi, U. Hofer & J. Nösberger
617 Transmembrane hyperpolarization and increase of K^+ uptake in maize roots treated with permeant weak acids
M. T. Marrè, G. Romani & E. Marrè
625 Accumulation and conversion of sugars by developing wheat grains. 4. Effects of phosphate and potassium ions in endosperm slices
A. H. G. C. Rijven & R. M. Gifford
633 Changes in the optical properties of cotyledons of *Cucurbita pepo* during the first seven days of their development
M. Seyfried & E. Schäfer
641 Relationships between root morphology and nitrogen availability in a recent theoretical model describing nitrogen uptake from soil
D. Robinson & I. H. Rorison
649 Influence of insulating dead leaves and low temperatures on water balance in an Andean giant rosette plant
G. Goldstein & F. Meinzer
657 The effect of nitrogen and phosphorus on starch accumulation and net photosynthesis in two variants of *Panicum maximum* Jacq.
D. Ariovich & C. F. Cresswell
665 Natural convection from leaves at realistic Grashof numbers
M. Dixon & J. Grace
671 Estimation of an effective soil water potential at the root surface of transpiring plants: short communication
H. G. Jones
675 A comparative study of the effects of NaCl salinity on respiration, photosynthesis, and

leaf extension growth in *Beta vulgaris* L. (sugar beet)
J. C. Papp, M. C. Ball & N. Terry
679 Book reviews

PART 9

683 Turgor-regulated translocation: opinion
A. Lang
691 Growth and development of *Pinus radiata* D. Don: the effect of light quality
D. C. Morgan, D. A. Rook, I. J. Warrington & H. L. Turnbull
703 The relationship between stomatal conductance, transpiration rate and tracheid structure in *Pinus radiata* clones grown at different water vapour saturation deficits
D. Whitehead, D. W. Sheriff & D. H. Greer
711 High and low temperature tolerances and their relationships to distribution of agaves
P. S. Nobel & S. D. Smith
721 Vegetative crop growth model incorporating leaf area expansion and senescence, and applied to grass
I. R. Johnson & J. H. M. Thornley
731 Factors affecting the induction and release of secondary dormancy in *Kalanchoë* seeds
R. Rethy, A. Dedonder, H. Fredericq & J. De Greef
739 Tetraphenylphosphonium (TPP^+) is not suitable for the assessment of electrical potentials in *Chlorella emersonii:* short communication
H. Gimmler & H. Greenway
745 Book reviews
751 Instructions to contributors
